Will a solar energy park be built in the port of Riga?

Today, on 9 September, an agreement was signed between the Freeport of Riga Authority and the Lithuanian company SNG Solar on the lease of land in the Port of Riga in the Spilve Meadows area for the development of a solar energy park.

How much will SNG solar invest in Freeport of Riga?

SNG Solar won the auction organised by the Freeport of Riga Authority for the land lease right and at the beginning of May the Freeport of Riga Board decided to enter into an agreement with the Lithuanian company. The total investment in the park is expected to be between EUR 60 and 80 million.

What is solar glass processing technology?

Our solar glass processing technology focuses on precision and productivity. Featuring a high degree of automation, our advanced solutions deliver high accuracy and quality. You can optimize profitability with streamlined solar glass production that adapts to evolving market demands. Maximum precision and productivity in quarterlite production

What are the types of glass processing?

All kinds of processing glass: glass cutting, laminated glass cutting, glass edge processing (grinding, polishing, faceting), glass drilling, milling, glass tempering, kitchen glass panel manufacturing to the size of a desktop sets, etc. Specialized transport is provided for glass transportation.
