Italy's largest energy storage system based on used batteries for electric vehicles was inaugurated on Tuesday at Rome's Fiumicino airport to help it reduce carbon emissions.

Developed by Italian utility Enel and airport operator Aeroporti di Roma (ADR), the 10 MWh battery energy storage system (BESS) strengthens the airport's energy autonomy ...

Using Rome Airport as an example, the planned 2nd-life battery storage in combination with a PV system shows the way towards the goal of net ...

The project will be developed at Rome Fiumicino International airport and the energy stored will cover evening peak-demand, while also providing flexibility services to the grid.

Developed by Italian utility Enel and airport operator Aeroporti di Roma (ADR), the 10 MWh battery energy storage system (BESS) ...

The Rocky Mountain Hydroelectric Plant is a pumped-storage power plant located 10 miles (16 km) northwest of Rome in the U.S. state of Georgia. It is named after Rock Mountain on top of ...

Located near Rome, Ga. in the southern Appalachian Mountains, the Rocky Mountain Pumped-Storage Hydroelectric Plant is capable of producing 1,095 megawatts of clean energy, enough ...

The plant will be integrated with the PIONEER project, a 10 MWh second-life Battery Energy Storage System (BESS) that will store excess solar power to use at night, helping keep the ...

Governor Hochul announced awards for 22 large-scale solar and energy storage projects that will deliver enough clean, affordable energy to power over 620,000 New York homes for at least ...

A new energy storage facility at Rome's Fiumicino Airport is using second hand car batteries in a bid to reach Net Zero Carbon by 2030. The storage system known as "Pioneer" is the largest ...
