What is a prefabricated temporary bridge?

Our engineer- rated, prefabricated temporary bridges are designed for easy transport and fast installation. They are the ideal site access solution for voids up to 60'.

What is a compact bridge system?

The compact bridge system uses standard,interchangeable steel componentsto provide robust,rapidly deployed and erected solutions for; permanent bridges,temporary bridges,rural bridges,access bridges,footbridges and emergency and contingency bridging applications.

What are bridge panels made of?

The bridge panels are composed of welded high-grade structural steel elements. The girders are lightweight composite panels connected by sturdy steel pins. Panels and components of the steel bridge are easy to handle and transport,can be interchanged,and are simple to erect and disassemble.

What are ESC modular steel bridges?

ESC modular steel bridges are prefabricated structurescomposed of steel truss panels,transom beams,reinforcing chords,bracings,decking boxes and connection components that can be rapidly assembled on-site. These bridges are designed to be portable,reusable,and adaptable to various sizes and load requirements.

Built to ISO shipping-container standards, the TF-20 is designed for easy transport using common shipping infrastructure. It's easier and less expensive to move than any other unit of this size ...

Closure bridges can be made either directly into the mould during the cap forming phase, or by slitting process in a post moulding stage.

These portable, fast deploying, temporary bridges can be easily transported on a standard flatbed truck and skidded into place with excavation equipment and a small crew in one hour.

Crafted with an engineered steel frame and fully powder-coated for long-lasting protection, our bridge kits are shipped disassembled for convenience. All components can be assembled ...

We'll take a look at if it's possible to repurpose a shipping container into a functional bridge and some of the
