TIGI's high-temp solar array enhances Slovenia's Vrasko district heating, integrating renewable energy into existing utility infrastructure

Slovenia is advancing plans for the Druzmirje Floating Solar Power Plant (Druzmirje FSPP), a 140 MW project set to become the country's first and Europe's largest ...

Slovenia approves a new 30 MW solar power plant, a major step in its renewable energy goals. Discover how this project supports EU targets and a greener economy.

In this work, we are focusing on evaluation of a fleet of PV systems in Slovenia where the electrical data is limited to the hourly output energy data while the orientation and ...

Slovenia installed 85 MW of solar in the first half of 2025, driven by growth in commercial and industrial (C&I) projects and utility-scale installations. The lowest total in four ...

Today, new advancements are emerging in the field of medium- and especially high- to ultra-high temperature storage systems, requiring innovative insulation techniques, ...

Slovenian energy company HSE is developing a 140 MW floating solar project, with work currently underway on spatial planning activities. The solar plant is set to become ...

The present paper presents a comprehensive and thorough review of a performance analysis of PV systems in Slovenia, which provides researchers and the interested public ...

As a country that became an EU member state a full two decades ago, Slovenia implements all European plans, standards and strategies consistently, including its climate strategy that will ...

By embarking on the installation of a large-scale floating PV system, HSE is joining a select group of developers spearheading innovative solar power projects in Southeastern ...
