Anza reports on U.S.-made solar modules, cells and battery energy storage in today's pipeline and offers a glimpse at manufacturers' efforts to ramp up production.

The United States installed 7.4 GW of utility-scale solar, wind and energy storage in the first quarter of 2025, falling just short of the ...

The Tesla Energy business expanded in Q1 2024 to a new quarterly record as the battery energy storage system (BESS) segment continued to grow.

The United States installed 7.4 GW of utility-scale solar, wind and energy storage in the first quarter of 2025, falling just short of the record 8.1 GW installed in the first quarter of...

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record ...

Construction for this project is expected to start in the first quarter of 2025. NYCIDA helps to lower the cost of capital investment through discretionary tax benefits.

Envision Energy announced an 8-MWh, grid-scale battery that fits in a 20-ft (6-m) shipping container this week while at the third Electrical Energy Storage Alliance (EESA) ...

Fleets of lithium-ion battery units now absorb surplus solar power at midday and release it during evening peaks when electricity prices soar.

Anza reports on U.S.-made solar modules, cells and battery energy storage in today's pipeline and offers a glimpse at manufacturers' ...

In the first quarter of 2024, nearly 1.3 gigawatts (GW) of battery storage was installed at power plants, homes, and commercial facilities across the nation, according to new ...

A key challenge in the solar container market is the unstable power supply and battery limitations, which affect system efficiency and reliability. Since solar containers rely on sunlight, energy ...

**Record-Breaking Storage Growth:** Battery storage capacity surpassed 30 GW nationwide, representing a 65% increase year-over-year, with Q1 2025 setting a new first-quarter record at ...
