Should California host a lithium-ion battery plant?

Following a lithium-ion battery fire at the Moss Landing plant in Monterey County in California, communities nationwide are expressing concerns about hosting similar plants. MICHEL MARTIN, HOST: California leads the nation in a race to deploy battery energy storage facilities.

Will California deploy battery energy storage facilities?

MICHEL MARTIN, HOST: California leads the nation in a race to deploy battery energy storage facilities. They bank electricity from sources like solar and wind so it can be used later.

What is a battery energy storage system?

Battery energy storage systems (BESS) involve lithium batteries, which are housed in structures similar to shipping containers. With a growing number of solar projects in the pipeline - including a number of "mega-farms" in Norfolk - more storage is needed for the energy they generate.

How many homes can a lithium battery power?

A large lithium battery energy storage system operated by Key Capture Energy that can power 15,000 homes for two hours during outages or high demand sits surrounded by a fence in Blasdell, N.Y., on Sept. 9. Ted Shaffrey--AP Photo

In recent months, however, some of the planned capacity has been delayed, put on hold, or even cancelled due to weaker-than-anticipated EV demand growth and the impact of ...

A battery storage system in Moss Landing, California caught fire in January, sending plumes of toxic smoke into the atmosphere and forcing the evacuation of about 1,500 people.

Plans for an energy storage facility in the Norfolk countryside have been suspended following a public backlash. Renewable Power Capital (RPC) ...

Energy storage projects are facing increasing scrutiny from local residents in parts of the U.S. Residents have voiced concerns about fires at energy storage facilities - in ...

Communities across the U.S. are enacting moratoriums on large battery energy storage systems amid fire safety fears as installations surge nationwide.
