Saflex®; Solar PVB interlayers are high-visible light transmittance, infrared (IR) radiation-absorbing interlayers designed to enhance solar heat gain performance in laminated glass compared to ...

Viracon offers a variety of interlayer materials that provide enhanced safety and security protection, as well as solar ultraviolet protection and acoustic ...

Discover the power of Saflex Solar and its combinations with other Saflex or Vanceva interlayers. Explore innovative solutions for solar control and design freedom.

Here is a deep dive into solar panel technology and the latest industry trends from Satinal, an Italian company that produced interlayers for laminated safety glass.

Saflex Solar interlayers are high-visible-light -transmittance, infrared (IR) radiation-absorbing interlayers designed to enhance solar heat gain performance. The ideal solar product ...

Here is a deep dive into solar panel technology and the latest industry trends from Satinal, an Italian company that produced interlayers ...

SEKISUI S-LEC produces various PVB interlayers for architecture glazing, with solar being one of many solutions. Standard features include safety (anti-breakage) and security (anti-break-in) ...

In essence, photovoltaic laminated glass interlayer films are a critical component in making solar installations safer, more efficient, and adaptable to real-world conditions.

Viracon offers a variety of interlayer materials that provide enhanced safety and security protection, as well as solar ultraviolet protection and acoustic sound reduction.

Saflex Solar is a solar absorbing PVB interlayer that brings improved solar control by reducing solar heat gain versus clear and conventional laminated glass without coatings.

Saflex® Solar interlayers are high-visible light transmittance, infrared (IR) radiation-absorbing interlayers designed to enhance solar heat gain performance in laminated glass compared to ...

Saflex Solar PVB interlayers offer superior solar control, reducing heat gain and UV radiation while maintaining high visible light transmittance for laminated glass.
