MLex Summary: EU tariffs on solar glass imports from China will face an expiry review of existing anti-dumping and anti-subsidy duties, the European Commission said.

The solar glass subject to the measures includes all glass fulfilling the abovementioned technical and physical characteristics, whether it is used for photovoltaic modules, flat photothermal ...

Compared to regular glass, solar control glass is superior in regulating heat, reducing glare, and improving energy efficiency. Regular glass, on the other hand, does little ...

The fact that it covered glass used for other purposes, such as to build greenhouses and for furniture, was clarified in the original anti-dumping and countervailing ...

In hot climates, solar control glass can be used to minimise solar heat gain and help control glare. In temperate regions, it can be used to balance solar control with high levels of natural light.

This article provides a detailed overview of solar energy regulations and permits, emphasizing their relevance and importance in facilitating the growth of solar energy.

In this study, we propose a thermal-optical dual-mode strategy for dynamic solar regulation by integrating antireflection microstructures and an infrared-blocking coating (AMIC) ...

The fact that it covered glass used for other purposes, such as to build greenhouses and for furniture, was clarified in the original ...

The solar glass subject to anti-dumping duty includes all glass fulfilling the abovementioned technical and physical characteristics, whether it is used for photovoltaic ...

The regulatory landscape for PV glass coatings has developed in parallel with technological advancements. Early regulations focused mainly on basic safety standards, but have ...

In May 2014, the Commission imposed a definitive anti-dumping duty on imports of solar glass originating in the People's Republic of China ("the PRC" or "China"), by Commission ...
