Construction crews are building this technology combination across America at record levels - solar-plus-storage composed 84% of new U.S. grid capacity installed in 2024, ...

Today, the Solar Energy Industries Association (SEIA) is unveiling a new policy agenda that details the critical actions that local, state and federal leaders must take to ...

Energy storage resources have become an increasingly important component of the energy mix as traditional fossil fuel baseload ...

SEIA has a new policy agenda centered on electric reliability in the United States. The new policy agenda details actions for local, state and federal leaders to take to strengthen ...

As the United States grapples with shifting political winds, developers in the distributed solar and storage market are facing a ...

SEIA has a new policy agenda centered on electric reliability in the United States. The new policy agenda details actions for local, state ...

Sometimes energy storage is co-located with, or placed next to, a solar energy system, and sometimes the storage system stands alone, but in either configuration, it can help more ...

Among the innovative solutions paving the way forward, solar energy containers stand out as a beacon of off-grid power excellence. In this comprehensive guide, we delve into ...

As the United States grapples with shifting political winds, developers in the distributed solar and storage market are facing a potential policy storm.

In 2024, generators added a record 30 GW of utility-scale solar to the U.S. grid, accounting for 61% of capacity additions last year. We expect this trend will continue in 2025, with 32.5 GW ...
