---

As soon as operational, the challenge will ship renewable electrical energy to the Latvian grid and improve flexibility within the energy system by way of the co-located battery ...

Latvia is taking a major leap forward in its renewable energy transition with the development of a hybrid 65 MW solar park and a 92 MWh battery energy storage system ...

SUNOTEC builds massive solar and battery storage project in Latvia, boosting renewable energy, energy independence, and economic growth. A game-changer for Latvia's energy future.

The company has committed EUR6 million to install cutting-edge energy-saving battery systems (BESS) at its three high-capacity solar power parks in Valmiera, Aizkraukle, and Ilukste.

Denmark-based European Energy has received EUR 37.9 million in long-term financing from Luminor to build a hybrid solar and battery project in Saldus, Latvia. The plan ...

Solar energy generation in Latvia has reached market saturation, meaning the overall electricity system should now focus on other types of production, said Sandis Jansons, ...

In a major stride toward Europe's renewable transition, European Energy announced the sale of a 50% stake in the 111 MW Saldus solar + battery energy storage ...

The addition of two utility-scale battery energy storage systems (BESS) in Latvia marks the final milestone in synchronizing the Baltic power grids with continental Europe, ...

Latvia's Energy Strategy 2050 outlines major changes in renewable energy production and storage, with significant investments planned in wind, solar, biomass, and ...

Latvenergo said it will build the battery energy storage system (BESS) projects in response to increasing demand for flexibility and to synergise with its hydropower, gas-fired ...
