Who prepared the Solomon Islands national infrastructure priority pipeline 2023?

This Solomon Islands National Infrastructure Priority Pipeline 2023 was prepared by the Ministry of National Planning and Development Coordination (MNPDC). We would like to thank the Government of Australia for providing technical assistance to work alongside our team in undertaking the analyses and preparing this document.

What is the importance of infrastructure in the Solomon Islands?

P.O. Box G30, Honiara, Solomon Islands. The Solomon Islands Government recognises that infrastructure is a critical enabler of economic and social development. Transport connectivity supports the movement of people and goods, supporting an efficient and productive economy.

Is logging in the Solomon Islands Sustainable?

Isabel has been one of the main centres of logging activity on the Solomon Islands and the Provincial Government recognises that current levels of extraction are unsustainable. Creating alternative sources of income to these royalties will be a major priority for the Province in years to come.

What is the Solomon Islands national infrastructure plan (siniip)?

investment climate and inspire the confidence of national and international investors. The first Solomon Islands national infrastructure plan (SINIIP) was produced in 2013. The Pipeline of projects was reviewed, refreshed and updated in 2021 to reflect more up to date infrastructure priorities.

In this study, we investigate the potential of foldable containers to improve empty container repositioning in river-sea intermodal transport, with consideration of bridge height ...

One of the difficulties of repositioning empty containers is that they require the same spaces for transport and storage as full containers. To alleviate this problem, introducing ...

This study considers the empty container repositioning problem of shipping companies that use standard and 3-in-1 foldable ...

Numerous scenario analyses and simulations of empty container repositioning were conducted, focusing on a liner shipping service in the Pacific Islands where empty containers are likely to ...

Consistent with the picture across much of Solomon Islands, around 95% of households reported growing crops with around half of these growing to sell as well as for subsistence.

This approach reflects Solomon Islands' unique challenges as a Pacific nation, prioritizing basic transportation services and maritime connectivity while addressing climate vulnerability.

Market Forecast By Type (Mobile Modular Containers, Fixed Modular Containers), By Source (New Product Sales, Rental), By Usage (Office Container, Sanitary Container, Locker ...

This study considers the empty container repositioning problem of shipping companies that use standard and 3-in-1 foldable containers with more advanced designs.

To solve the complex loading problem, a hybrid genetic algorithm combined with simulated annealing (hybrid GA-SA) is developed.

Heuristic algorithms are proposed to solve the mathematical models. Numerical experiments are carried out in several scenarios to demonstrate the economic feasibility of ...

This study considers the empty container repositioning problem of shipping companies that use standard and 3-in-1 foldable containers ...
