Designed for Plug and play operations, the ZSC range of mobile solar power is easy to setup and commission. The compact container is easy to transport and is a low maintenance asset on site.

Ezra Group, a South Sudan family-run conglomerate, on Monday announced the launch of a 20-MW solar power plant with a 14-MWh battery energy storage system in South ...

The global solar storage container market is experiencing explosive growth, with demand increasing by over 200% in the past two years. Pre-fabricated containerized solutions now ...

The mobile solar containers and portable solar chargers are designed with easily foldable solar panels which makes them ideal for remote areas and versatile applications like mining, ...

In South Sudan's energy-starved landscape, the Juba Mobile Energy Storage System Project emerges as a game-changer. This innovative solution tackles chronic power shortages while ...

The Ethiopia-South Sudan interconnector will have a transmission capacity of 400 MW and will cover a distance of 357 km at 230 kV. The project has received funding from the ...

South Ossetia's Phase I bidding aims to deploy 120 MWh of battery storage capacity, addressing energy security challenges and enabling 24/7 renewable power supply. [pdf]

In March 2020, South Sudan's installed generation capacity was reported as approximately 130 MW. Most of the electricity in the country is concentrated in Juba the capital and in the regional centers of Malakal and Wau. At that time the demand for electricity in the county was estimated at over 300 MW and growing. Nearly all electricity sources in the country are fossil-fuel based, with attendant challenges of cost and environmental pollution. There are plans to build new generati...

Emerging markets in Africa and Latin America are adopting mobile container solutions for rapid electrification, with typical payback periods of 3-5 years. Major projects now deploy clusters of ...
