-----

Deputy governor Thawatchai Samranwanit said EGAT has three projects to build pumped-storage hydropower plants at the Vajiralongkorn Dam in Kanchanaburi, the Krathoon Dam in Nakhon ...

"By integrating battery storage with solar power, these projects will help to provide clean energy during non-daylight hours, grid stability, and facilitate further integration of solar ...

The Electricity Generating Authority of Thailand (Egat) plans to convert three hydropower dams into massive energy storage systems with a 90-billion-baht investment. This ...

The Electricity Generating Authority of Thailand (Egat) plans to convert three hydropower dams into massive energy storage systems ...

Adding 32GW of new solar capacity, plus 15GWh of batteries, to Thailand's power generation deployment targets could cut power ...

The USD2.6 billion project aims to enhance energy storage and support the growing share of renewable energy, such as wind and solar. These PSPPs will help stabilize ...

Thailand's 2024 plan increases renewable energy, highlighting crucial battery storage systems for buildings and power generation.

The USD 2.6 billion project aims to enhance energy storage capabilities and support the increasing integration of renewable energy sources, such as wind and solar, into ...

Thailand may lack the Battery Energy Storage Systems (BESS) necessary to navigate supply and demand challenges. The 2024 PDP draft included 10,000 MW of BESS, ...

This project's goal is to convert 38% power used at the Lopburi Plant in Bang Pa-In to renewable energy. The project introduces a large battery storage that helps minimizing surplus power, ...
