In April of 2025, the energy storage industry announced a commitment to invest \$100 billion into building and buying American-made batteries. This commitment is expected to generate more ...

YMIN offers a wide selection of capacitance solutions to serve ESSs, including aluminum and hybrid electrolytics, film capacitors, and SCs. Explore this paper to learn more ...

This report involved significant engagement with subject matter experts and others who are familiar with supercapacitors and energy storage more broadly. Thank you to all of the ...

With time-of-use rates and blackout risks on the rise, the demand for safe, long-lasting energy storage has never been greater. Graphene supercapacitor-based tech could be ...

Of the 1,643 operational energy storage projects worldwide, 49% are located in the U.S., with another 131 projects under construction. 10 California leads U.S. capacity with 15.5 GW, ...

The U.S. energy storage market delivered a record-breaking quarter in Q3 2025, installing 5.3 GW nationwide and pushing year-to-date additions past the total installed ...

Now, Washington University in St. Louis researchers have unveiled a groundbreaking capacitor design that looks like it could overcome those energy storage ...

Through a U.S. Department of Energy grant, the University of Texas at Tyler is working closely with UT Dallas to develop a new generation of rechargeable battery technologies based upon ...

The convergence of smart grid projects and energy storage mandates creates substantial growth corridors for capacitor manufacturers, with projected CAGR exceeding ...

U.S. battery storage capacity has been growing since 2021 and could increase by 89% by the end of 2024 if developers bring all of the energy storage systems they have ...
