Parts of Cuba experienced blackouts starting on 8 February 2024. On February 13, 45% of the country was affected by power outages. In March 2024, Cuba experienced large-scale power outages, amidst an economic crisis that hit the country. The blackouts, which peaked on 17 March and typically lasted for up to 18 hours a day, were due to the frequent breakdowns of the Antonio Guiteras Thermoelectric Power Plant, ...

Emily Morris, a senior research fellow at the University College London's Institute of the Americas, who studies Cuba's economy, explained the origins of the crisis and where ...
