How many large-scale storage systems does Victoria have?

Victoria has 12 commissioned large-scale storage systems and 3 in commissioning - with a total output capacity of 1028 MW and storage capacity of more than 1.7 GWh. Storage capacity = how much total energy is stored in each battery. Output capacity = how much energy a battery can provide at a given time.

How many energy storage projects are there in western Victoria?

In March 2018, 2 projects in Western Victoria were chosen to be part of The Energy Storage Initiative - one in Ballarat and one in Gannawarra. Construction for the Ballarat and Gannawarra Energy Storage Systems was completed in late 2018. Both batteries began operating over the summer of 2018 and 2019.

Why is Victoria a good place to store batteries?

Victoria is the home of big batteries and has legislated storage targets of at least 2.6 GW by 2030 and 6.3 GW by 2035 to provide crucial support for more renewable capacity. Storage is a vital part of our electricity grid. In the future, much of our energy will be generated closer to where it is used and the way we use it will be more efficient.

What percentage of Victoria's Electricity generation is renewable?

For 2024/25, renewable energy was 42.4% of Victoria's electricity generation - and we've closed out the financial year with a strong pipeline of projects that puts Victoria well placed to achieve our 40% renewable electricity generation target by the end of 2025. Figure 2: Victorian renewable electricity generation share, 2013/14 to 2024/25

Energy Vault Holdings, Inc., a leader in sustainable, grid-scale energy storage solutions, has announced the start of construction of a 200 MW/2 hour battery energy storage ...

Victoria, Australia, has secured the largest allocation of dispatchable power in the upcoming Capacity Investment Scheme (CIS) tender, with 1.7GW/6.8GWh for energy storage.

The Department of Environment, Land, Water and Planning (DELWP) engaged PwC as financial and commercial advisor to prepare the validation business case for the AEMO-led ...

The Department of Environment, Land, Water and Planning (DELWP) engaged PwC as financial and commercial advisor to prepare the ...

Under this agreement, Energy Vault will supply and integrate a 100 MW/200 MWh battery energy storage system (BESS) at the SEC Renewable Energy Park - Horsham, located in Victoria, ...

Without enough long duration storage, Victoria will rely on fossil gas power plants and electricity imports from other states to cover gaps in supply when there is less renewable energy available.

Victoria, Australia, has secured the largest allocation of dispatchable power in the upcoming Capacity Investment Scheme (CIS) ...

Storage is a vital part of our electricity grid. In the future, much of our energy will be generated closer to where it is used and the way we use it will be more efficient. Our modern ...

Dentons continues to advise clients across the renewable energy and transmission sectors on all aspects of the VTP and similar frameworks nationwide, including ...

This guide focuses on energy storage system procurement with a detailed exploration of the challenges, opportunities, and the methodologies that can be undertaken to enhance decision ...

Victoria's push toward renewable energy integration and grid resilience has made emergency energy storage procurement a top priority. With extreme weather events and aging ...

The energy storage targets will include short, medium and long duration energy storage systems, allowing energy to be moved around during the day to meet demand and to ...
