What is Vietnam's 5G development strategy?

Vietnam's 5G development strategy has been clearly defined in national digital technology and infrastructure policies. To achieve the goal of an average transmission speed of 100 Mbps by 2025 and nationwide 5G coverage by 2030, many solutions are being actively deployed.

How many 5G stations are there in 2025?

According to information from the Radio Frequency Department (Ministry of Science and Technology), by May 2025, Viettel, VNPT and MobiFone had deployed about 11,000 5G stations in 100% of provinces and cities nationwide and covered 5G over 26% of the population.

What is the frequency band of 5G in Vietnam?

Vietnam has issued important plans, focusing on strategic bands such as 2600 MHz, 3700 MHz, below 1 GHz and 700 MHz. In total, nearly 1000 MHz of spectrum in the 6 GHz band has been allocated for mobile telecommunications. To select capable businesses, the frequency band for 5G mobile network is auctioned publicly and transparently.

How will Vietnam be positioned to support 5G?

g particular technologies. In this way, Vietnam will be optimally positioned to support the longer-term growth of 5G and to realise its full socio-economic benefits for all citizens and enterprises across all sectors of its rapidly growing economy.

Vietnam's three major mobile operators have collectively rolled out 11,000 5G base stations, and the government expects that figure to nearly double by the end of 2025.

The country's three leading telecom operators--Viettel, VNPT, and MobiFone--have deployed around 11,000 5G base stations ...

Vietnam expects to deploy more than 68,000 5G base stations this year alone, equivalent to 57.5% of current 4G stations and sufficient ...

The country's three major network providers - Viettel, VNPT and MobiFone - have so far deployed around 11,000 5G base stations, ...
