What is the ANSI/ISO standard for containerized munitions shipments?

The 20-foot ANSI/ISO container is designated as the DOD standard for containerized munitions shipments. Therefore, only 20-foot containers will be used in the CADS fleet. Equipment acquisitions and support systems interface with the DOD intermodal container system.

What equipment does a container terminal use?

A container terminal relies on an array of intermodal equipment to perform its operations, including straddle carriers, gantry cranes, and portainers (ship-to-shore cranes). The choice of equipment and its mix is influenced by several factors, including capital investment, volume, stacking density, and productivity. Forklift.

What storage containers does C&E offer?

In addition to the containers listed in this program book, the C&E Container Program also offers a wide variety of additional storage container solutions, from 55 gallon drums to oil sampling bottles.

What is a container program?

21 The DLA Troop Support Construction and Equipment Supply Chain developed the Container Program to provide resources designed to securely move and store supplies, weapons and equipment from one transport method to another mode without unloading and reloading the contents.
