Energy Storage Is Powering New York's Clean Energy TransitionEnergy Storage SafetyAn Expanded Goal of 6 Gigawatts by 2030In 2019, New York passed the nation-leading Climate Leadership and Community Protection Act (Climate Act), which codified some of the most aggressive energy and climate goals in the country, including 1,500 MW of energy storage by 2025 and 3,000 MW by 2030. In June 2024, New York's Public Service Commission expanded the goal to 6,000 MW by 2030. St...See more on nysersda.ny.gov.

Energy Storage Is Powering New York's Clean Energy Transition

Energy Storage Safety

An Expanded Goal of 6 Gigawatts by 2030

In 2019, New York passed the nation-leading Climate Leadership and Community Protection Act (Climate Act), which codified some of the most aggressive energy and climate goals in the country, including 1,500 MW of energy storage by 2025 and 3,000 MW by 2030. In June 2024, New York's Public Service Commission expanded the goal to 6,000 MW by 2030. See more on nysersda.ny.gov.

Energy Storage Safety

Energy storage is a critical component of a clean energy system, providing a way to store excess energy from renewable sources like wind and solar. This stored energy can then be used when demand is high or when renewable sources are not producing, ensuring a steady and reliable supply of power. Safety is a top priority in the design and construction of energy storage systems, with rigorous standards and protocols in place to prevent accidents and ensure the long-term stability of the infrastructure.

An Expanded Goal of 6 Gigawatts by 2030

New York's ambitious goal of 6,000 MW of energy storage by 2030 reflects the state's commitment to a clean energy future. This goal is a significant expansion from the previous target of 3,000 MW, demonstrating the state's confidence in the technology and its potential to meet the growing demand for clean energy. The expansion is driven by the state's leadership in renewable energy and its commitment to reducing greenhouse gas emissions and improving energy security.
