This study aims to evaluate the current status of South Sudan's energy resources by considering the energy security issue.

South Sudan faces a serious energy crisis due to a number of factors, including devastating conflicts (e.g. 1955-172, 1983-2005 & 2013-present) and reliance on the fossil fuel source. ...

You know, South Sudan's energy crisis isn't just inconvenient - it's literally holding back development. With only 7% of the population connected to grid electricity, most communities ...

This paper proposes an optimized energy management strategy (EMS) for photovoltaic (PV) power plants with energy storage (ES) based on the estimation of the daily solar energy ...

Find relevant information for South Sudan on energy access (access to electricity, access to clean cooking, renewable energy and energy efficiency) on the Tracking SDG7 homepage.

The initiative aims to update the energy sector diagnostics and analytics to inform the re-engagement in South Sudan's energy sector. Additionally, the programme will develop options ...

Implementing energy storage integration here isn't for the faint-hearted. Consider: While droughts cripple hydropower, they've accidentally boosted solar adoption. Every cloudless day becomes ...

A just-commissioned solar and battery storage system will reduce diesel consumption by at least 80% at a base for 300 humanitarian workers in South Sudan managed by UN migration body ...

Battery storage systems are emerging as game-changers, particularly when integrated with solar power. But how do these systems perform under Juba's extreme temperatures (averaging ...

This case study explains how the storage system fulfil several major functions: voltage generation, frequency regulation on the microgrid, energy supply/storage in the event of sudden load ...
