Where are battery energy storage systems located?

The battery energy storage systems (BESS) will be located in Marsa and Delimara, on Enemalta grounds in both localities. First announced in June 2023, the project is being led by Interconnect Malta, an energy ministry agency responsible for energy infrastructure projects.

What is Malta's Energy & Climate Strategy?

This project is in alignment with Malta's energy and climate strategies, as it emphasises the integration of energy emanating from renewable sources and the mitigation of energy curtailment, thus enhancing energy security and reducing carbon emissions.

What if Malta is isolated from the Italian Grid?

Provide fast frequency and voltage stabilisation to the Maltese grid in case Malta is isolated from the Italian grid because of maintenance or faults. ERA reviews the Project Description Statement and confirms that an Environmental Impact Assessment (EIA) is not required

How does the Bess project affect PV generation in Malta?

The BESS project is also intended to mitigate weather-related challenges posed by renewable energy sources, which are reliant on climatic conditions and can therefore lead to significant dips in generation during moments of sudden cloud coverage severely affecting the PV generation in Malta.

The battery energy storage systems (BESS) will be located in Marsa and Delimara, on Enemalta grounds in both localities. First announced in June 2023, the project is ...

A solar battery system is the smartest upgrade to any solar panel installation in Malta. By storing excess energy, you reduce dependence on the grid ...

The system is identical to an on-grid system, however instead of being connected to the Enemalta grid, the power is stored in batteries; lithium or ...
