How to display power plants in Germany?

There are several different options for displaying the power plants. One can either show the power plants as a group in each of the German states or select the plants according to their different types of fuel. The fuel selection includes: hydropower, biomass, nuclear, lignite, hard coal, oil, gas, pumped storage, seasonal storage and wind power.

How many coal power plants are there in Germany?

For traction current, see List of installations for 15 kV AC railway electrification in Germany, Austria and Switzerland. As of July 2023, Germany still had 58 active coal power plants. [unreliable source?] Under the Atomic Energy Act, the last three nuclear energy plants were shut down by April 2023.

How do I see the power plants and transmission grids in Germany?

The map of the power plants and transmission grids in Germany can be displayed in different levels of detail. The simplest version shows Germany in gray tones and little detail. A second, more detailed version shows all the streets, and the highest level of detail is shown in the OpenStreetMap view.

How often does the Bundesnetzagentur update the list of power plants?
