This study proposes an advanced framework for EV charging infrastructure, integrating hybrid RESs (solar and wind) with an intelligent EMS, and a sophisticated smart ...

This paper addresses the design and optimization of a hybrid solar-wind EV fast-charging station, aiming to integrate solar and wind energy into EV charging infrastructure ...

The proposed system integrates photovoltaic (PV) panels, a proton-exchange membrane fuel cell, battery storage, and a supercapacitor to ensure reliable and efficient ...

Three distinct wireless EV charging load profiles are considered to evaluate the performance of the proposed optimization technique.

Integrating artificial intelligence (AI) with solar-powered electric vehicle (EV) charging systems plays a critical role in reducing greenhouse gas emissions, accelerating ...

Using advanced machine learning algorithms and optimization models, the study aims to develop an intelligent system that efficiently integrates renewable energy sources with EV charging ...

To address this, this study develops an integrated optimization framework combining ESS capacity planning with multi-type EV ...

This study proposes an advanced framework for EV charging infrastructure, integrating hybrid RESs (solar and wind) with an intelligent ...

To address this, this study develops an integrated optimization framework combining ESS capacity planning with multi-type EV scheduling strategies. For ESS ...

Engineering Vidarbha Institute Of Technology, Umrer road, Nagpur, India Abstract. The review comprehensively examines hybrid renewable energy systems that combine solar and wind ...

Wind solar storage and charging intelligent integration
