News from the photovoltaic and storage industry: market trends, technological advancements, expert commentary, and more.

The IRENA Coalition for Action will recommend specific policy actions to accelerate the deployment of solar PV and energy storage and their role in tripling global ...

The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two largest markets, the US and China, ...

In this report, our lawyers outline key developments and emerging trends that will shape the energy storage market in 2025 and beyond.

Without a global energy storage target, the goals of tripling renewables by 2030 and meeting the Paris Agreement are at risk. A six-fold increase in global energy storage capacity by 2030 is ...

The Green Energy Storage and Grids Pledge, launched on 15 November, targets a goal of 1.5TW of global energy storage by 2030, marking a sixfold increase from 2022 levels, ...

Solar power has become more affordable and efficient and, combined with storage solutions, will play a vital role in the global clean energy transition.

Utility-scale PV led global installations, but distributed PV remained strong in key markets including Germany, T&#252;rkiye, and Brazil. Curtailment is increasingly prevalent in high ...

Systematically examining the current state of the global energy storage industry through technology and cost, it provides in-depth forecasts of future trends and acts as a ...

Utility-scale PV led global installations, but distributed PV remained strong in key markets including Germany, T&#252;rkiye, and Brazil. Curtailment is ...

The paper emphasizes the importance of widespread strategy frameworks that not only encourage solar adoption but also discusses broader energy system dependencies. This ...
