Are Chinese solar power inverters connected to critical infrastructure grids?

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters connected to critical infrastructure grids across the country.

Are there undocumented communication devices in solar inverters?

Electronics experts involved in dismantling and analyzing electronic equipment had come across the undocumented communication units in the solar inverters. In the past nine months, undocumented communication devices such as mobile communication devices have also been found in some batteries from several Chinese equipment manufacturers.

Are Chinese-made solar inverters a supply-chain vulnerability?

Leading renewable energy operators worldwide are confronting a disturbing supply-chain vulnerability: undocumented communication modules found in Chinese-made solar inverters and batteries.

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters ...

A Reuters investigation, citing two individuals familiar with the matter, revealed that undocumented components were found during security inspections of inverters connected ...

In a plot twist worthy of a techno-thriller, U.S. energy officials have uncovered rogue communication devices embedded within Chinese-manufactured solar power inverters.

These undocumented communication modules offer an invisible back door into devices that regulate a growing share of the world's electricity. "It effectively means there is a ...

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within ...

components were found during ...

They're attached to the power sources to convert direct current to alternating current before it's transferred to the utility grid. The inverters include communication ...

This investigative article exposes the discovery of undocumented communication devices hidden in Chinese-made solar ...

Technical experts conducting detailed hardware inspections, or "teardowns," of inverters connected to U.S. power grids revealed the presence of unauthorized communication ...

Following the discovery of unknown communication devices in Chinese solar inverters, US energy authorities want to reassess their ...

These undocumented communication modules offer an invisible back door into devices that regulate a growing share of the ...

An in-depth analysis for executive leadership and board members on undisclosed communication devices in Chinese-manufactured inverters, and why immediate action is ...
